             Sequence 2, Application US/09146770

Patent No. 6187732

GENERAL INFORMATION:
APPLICANT: Fowler, Timothy
TITLE OF INVENTION: Mutant EGIII Cellulase, DNA Encoding
TITLE OF INVENTION: Such EGIII Compositions and Methods for Obtaining Same
FILE REFERENCE: GC546
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Patent No. 6562340

Sequence 11092, Application US/09960352

Sequence 11092, Application US/09960352

Patent No. US20020137139A1

GENERAL INFORMATION:

APPLICANT: Warren, Wesley C.

APPLICANT: Tao, Nengbing
APPLICANT: Byatt, John C.

APPLICANT: Warren, Nespapan

TITLE OF INVENTION: NUCLEIC ACID AND OTHER MOLECULES ASSOCIATED WITH LACTATION AND TITLE OF INVENTION: MUSCLE AND FAT DEPOSITION

FILLE REFERENCE: 16511.006/37-21(10298)C

CURRENT APPLICATION NUMBER: US/09/960,352

CURRENT FILING DATE: 2001-09-24

NUMBER OF SEQ ID NOS: 15112

SEQ ID NO 11092

LENGTH: 379

TYPE: DNA

ORGANISM: Bos taurus

OTHER INFORMATION: Clone ID: 48-BOVMS1-002-Q1-E1-D12
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  APPLICANT: Warren, Wesley C.
